

Introductory Course to Quantum GIS

GISSA's Open Source special interest group is running an **'Introduction to Quantum GIS'** course, open to all.

You will learn how to drive QGIS and how to use QGIS to perform the most common GIS operations, including:

- making a map (cartography)
- overlay analysis
- spatial queries
- data capture (mapping)
- editing

Presenters: Horst Duester (Guest presenter from Switzerland), Tim Sutton and Gavin Fleming.

Venue: Bridge House School, next to Graham Beck Estate, Franschhoek (<http://www.openstreetmap.org/?lat=-33.87900&lon=19.03053&zoom=14>)

Date: Saturday 14 August 2010 **Times:** 8h30 - 16h30

Cost: R150 (If you can't afford this, please come anyway and we'll make a plan)

Cost includes: lunch, teas, CD/DVD. Any profit goes towards equipping the school's GIS lab. Presenters' time is voluntary.

Please RSVP to gavinjfleming@gmail.com so we can plan resources.
