

Agreement

(Status: 2016/01/04)

between

Technischen Informationsbibliothek (TIB) – German National Library of Science and Technology, Competence Center for Non-textual Materials, Welfengarten 1B, 30167 Hannover, Germany

- subsequently **TIB** -

and

Surname, First Name: RAGHAYAN VENKATESH
(Creator or other rights holder, director of the institution)

Institution: The OSGeo Foundation
Address: 14525 SW Milikan #42523, Beaverton, Oregon, U.S.A.
E-Mail: venkat@osgeo.org
Location, Date: OSAKA, 2017-10-12

- subsequently **Licensor** -

in relation to the provision of non-textual material, metadata and preview files for the purposes of TIB.

TIB provides web-based access to non-textual material to its users (e. g. media with moving and still images, audio media and media with “spoken language”¹ and research data). The non-textual material is made accessible via TIB’s portals, displayed in a manner adapted to the media type, linked to further research information and (if licensed for this purpose) made available for download to users. Individual sequences, trailers or thumbnails are provided as previews.

Non-textual material will be subject to long-term preservation according to TIB’s concept if it is highly relevant for research and teaching and available in an appropriate technical format. If the non-textual material may be viewed online or is made available for download it shall be given an unambiguous identifier (e. g. DOI-name).

TIB develops new or implements known tools for the analysis of multimedia material such as form, speech or structure recognition to create additional content-related and structural metadata that can be of help to a user for his search. For this purpose TIB collects, analyses and archives non-textual material provided to TIB and processes them if necessary (e. g. segmentation, creation of visual abstracts, thumbnails, trailer, audiotranscripts, indexing, converting to other data formats also for the purposes of long-term preservation).

¹ EN ISO 14915-3 Software-Ergonomie für Multimedia-Schnittstellen part 3, pp. 6 ff.;

The Licensor wishes to provide non-textual Materials, Metadata and Preview Files as described in **schedule 1** to TIB either himself or through the institution he is affiliated to under the conditions of the following Creative Commons License for free and in perpetuity (**please choose a license**):

☒ **CC-Attribution-ShareAlike 2.5 Generic**

Link to the Summary and legally binding license text:

<https://creativecommons.org/licenses/by-sa/2.5/>

☐ **CC-Attribution-ShareAlike 3.0 Unported**

Link to the Summary and legally binding license text:

<https://creativecommons.org/licenses/by-sa/3.0/>

We recommend the Open Access License "CC-Attribution 3.0": This license imposes the least amount of restrictions for the use and insures that the work is attributed to the creator.

TIB may adapt and create derivatives of the Materials, Metadata and Preview Files for the purposes named above and allow partners of TIB in the context of a contractual cooperation the use of the Materials, Metadata and Preview Files. TIB may transfer all rights and obligations derived from this contract to another institution without explicit consent of the rightsholder, if other institutions permanently take over functions and responsibilities from TIB.

For the use of the Metadata and Preview Files the conditions of the Creative Commons License CC0 1.0 Universal (CC0 1.0) Public Domain Dedication shall apply (Link to the summary and legally binding version of the license: <http://creativecommons.org/publicdomain/zero/1.0/>).

TIB may extract the Licensor's logo from the website of the Licensor, adapt it in size if necessary for TIB's portals and use it to label the non-textual materials of the Licensor within TIB's portals.

Licensor declares that it has all necessary rights and authority to allow TIB the use of the Materials, Preview Files and Metadata pursuant to the terms and conditions set forth in this Agreement and that this Agreement does not infringe rights of third parties (e. g. copyright, rights of performers, personality or publicity rights, data protection). Licensor shall indemnify TIB against any charges, costs or damages brought forth by third parties against TIB claiming that the use of the Materials in accordance with this Agreement constitutes an infringement of copyright. The parties will cooperate closely to prevent any claims by third parties.

The Licensor confirms that the Material does not contain music, for which, if used as described above, the rights must be licensed separately from a collecting society or another institution.

TIB provides scientific information in all areas of engineering as well as chemistry, information technology, mathematics and physics to the public. If the materials do not satisfy the quality criteria TIB generally applies to scientific information, TIB may exclude the material from its services without prior notice.
