

GIS Analyst (part time, temporary)
Reischauer Institute of Japanese Studies, Harvard University

Position Description:

The Reischauer Institute of Japanese Studies is looking to fill a part time, temporary GIS Analyst position. The funding is for three months at 20hr/week, starting as soon as the position is filled. Work includes GIS data processing, geodatabase editing, spatial analysis, geocoding, image georeferencing, cartographic mapping, producing 3D and temporal visualization, GPS data post processing, image analysis, and web based mapping system usage and testing.

Requirements:

Reading-level Japanese language skills. Proficient in GIS analysis and spatial data modeling. Conversant with current and developing technologies such as GPS, digitizing, scanning and the current state of software development related to geographic analysis. Hands-on experience using ESRI software ArcGIS Desktop helpful. Experience in ModelBuilder, Python, ArcGIS Server, ArcSDE, Quantum GIS or PostGIS a plus; Attention to detail, and the ability to function as a contributing team member required. Must have strong communication skills.

Apply:

Please send resume and cover letter to kmlawson@fas.harvard.edu. The position is open until filled.
