

SUBMISSION TEMPLATE

PRESENTED BY

Workshops are 3 hours, and Lab sessions are 90 minutes. Both are hands-on classroom sessions. For your Workshop or Lab Session to be considered for the Free and Open Source for Geospatial (FOSS4G) 2008 Conference, please follow the guidelines and fill out the following fields as clearly as possible. All Workshops and Lab Sessions are to be delivered in English.

Guidelines

- Please note that the current submission is not the complete Workshop, but a preview to convince the committee that this Workshop/Lab Session is required at FOSS4G2008.
- Please note that a separate submission needs to be completed for each Workshop or Lab session that you would like to present.
- You may make multiple Workshop/Lab submissions for consideration by the Workshop Committee.
- You may submit “the same” content for both a Workshop and a Lab session, provided you can adapt the content to deliver a good session in both time formats..
- You may be requested by the Workshop Committee to provide more information if required to make a decision.
- The final Workshop/Lab session will be a result of ongoing discussions between Instructors and the Workshop Committee towards ensuring the highest standards and experience for the participants.
- The decision made by the Workshop Committee is final.
- The conference webpage (and related links) will host the latest information at all times on Workshops/Lab sessions.
