= Francophone Chapter Report 2007 =

Contact : Yves Jacolin (President of the Francophone Local Chapter)

OSGeo-fr Board : Gwenael Bachelot, Vincent Picavet, François Van Der Biest

== Introduction ==

This report aims at showing what Francophone Local Chapter achieved in 2007. The "Francophone" mailing list has been created in October 2006 and our first actions began in 2007 by discussing about the organization of the Local Chapter. Currently, we are close to being a true legal organization tackling GFOSS subjects. This doesn't mean nothing has been done yet, instead, it should be easier from now on to contribute to the GFOSS French-speaking Community.

This report covers the period from January to December 2007.

== 2007: one year to create the Francophone local chapter ==

After joining into the mailing list, it was necessary to organize ourselves:

- \* local chapter structure : who manages the local chapter? how?;
- \* write clearly on the wiki our goals;
- \* how could we organize ourselves and who people could join the local chapter.

This was not easy but OSGEO Guidelines and OSGEO organization helped us a lot: most questions were the same for all of us, and so the answers were always similar. We are now organized in three committees: free organization, free data, and free software committee. A Board with 4 people has been elected, which manages the Francophone Local Chapter projects. For time-consuming projects, a dedicated manager can be elected by the board.

== Introduction ==

This report aims at showing what Francophone Local Chapter achieved in 2007. The "Francophone" mailing list has been created in October 2006 and our first actions began in 2007 by discussing about the organization of the Local Chapter. **We** are **now** close to being a true legal organization tackling GFOSS subjects. This doesn't mean nothing has been done yet, **but** it should be easier from now on to contribute to the GFOSS French-speaking Community.

This report covers the period from January to December 2007.

**Ligne 12 :**

== 2007: one year to create the Francophone local chapter ==

After joining into the mailing list, it was necessary to organize ourselves:

\* **Local** chapter structure : **management and ways of action over** the local chapter;

\* **Clearly stated goals** on the wiki;

\* **Definition of how to** organize ourselves and who could join the local chapter.

This was not easy but OSGeo Guidelines and OSGeo organization helped us a lot: most questions were the same for all of us, and so the answers were always similar. We are now organized in three committees: free organization, free data, and free software committee. A Board with 4 people has been elected, which manages the Francophone Local Chapter projects. For time-consuming projects, a dedicated manager can be elected by the **Board**.

In September 2007, OSGeo Board accepted the Francophone Local chapter proposal.

Actions in 2007 focused on OSGeo visibility in Francophone countries, aka marketing missions. Three **main** actions have been undertaken: two tradeshows and the translation of the OSGeo journal. The first two volumes are now published and can be downloaded from the Journal home page.

With two tradeshows (GeoEvenement 2007 and GeoTunis 2007), OSGeo-fr worked a lot on marketing **projects**: presentation of OSGeo-fr and OSGeo, project's presentation and **documentation**. GeoEvenement 2008 tradeshow will show a bigger open source village with more conferences.

== 2008 : one year to improve our organisation ==

**As previously** said, we would like **this year** to finalize the creation of the legal OSGeo Francophone association. This will help us manage sponsorship, organize events in the name of a legal entity, plus many other benefits.

In September 2007, OSGeo Board accepted the Francophone Local chapter proposal.

Actions in 2007 focused on OSGeo visibility in Francophone countries, aka marketing missions. Three **main**s actions have been undertaken: two tradeshows and the translation of the OSGeo journal. The first two volumes are now published and can be downloaded from the Journal home page.

With two tradeshows (GeoEvenement 2007 and GeoTunis 2007), OSGeo-fr worked a lot on marketing **project**: presentation of OSGeo-fr and OSGeo, project's presentation and **a lot of information**. GeoEvenement 2008 tradeshow will show a bigger open source village with more conferences.

== 2008 : one year to improve our organisation ==

**This year, as we already** said, we would like to finalize the creation of the legal OSGeo Francophone association. This will help us manage sponsorship, organize events in the name of a legal entity, plus many other benefits.

We would also like to improve our internal processes, by creating working groups on specific subjects such as translation, event organization, sponsorship, and so on.

**Finally**, we compiled a list of actions for 2008, which will be put to vote, so as to determine the most important of them. The result will be our roadmap for 2008 !

== Conclusion ==

As shown below, our **plans** for 2008 **are greater** than **before**:

\* Géoévénement 2008, the **French** tradeshow, with a bigger open source village;

\* FOSS4G Francophone, in France;

\* work on free data opportunities;

\* more **translations**;

\* and much more projects.

We would also like to improve our internal processes, by creating working groups on specific subjects such as translation, event organization, sponsorship, and so on.

**To finish with**, we compiled a list of actions for 2008, which will be put to vote, so as to determine the most important of them. The result will be our roadmap for 2008 !

== Conclusion ==

As shown below, our **plan** for 2008 **is more important** than **the last one**:

\* Géoévénement 2008, the **french** tradeshow, with a bigger open source village;

\* FOSS4G Francophone, in France;

\* work on free data opportunities;

\* more **translation**;

\* and much more projects.
