

Volunteer Recognition

The OSGeo Journal is written, edited, and published by volunteer members of the OSGeo Foundation. This journal would not be possible without the hard work and dedication of our volunteers. We would like to recognize the hard work of the following volunteers on Volume 6 of the OSGeo, and want to give them our sincere thanks for their efforts.

Daniel Ames

Dr. Daniel P. Ames is an Associate Professor of Geosciences at Idaho State University, Idaho Falls, Idaho, USA. He directs the Geotechnologies graduate program which offers MS and PhD degrees in Geographic Information Science and Engineering and Applied Science, respectively. His research program is centered on the open source MapWindow GIS project (www.MapWindow.org), integrated environmental modeling (www.iemHUB.org), and hydroinformatics (www.HydroDesktop.org) under funding from the US EPA, NOAA, NASA, DOE, FEMA, and various commercial entities. He can be reached by e-mail at amesdani@isu.edu.

Jorge Sanz

Jorge Sanz is Consultant in Geospatial technologies at PRODEVELOP. HE received education and training in cartography, geodesy and geophysics at the Polytechnic University of Valencia.

He served for a short period as a researcher and lecturer at Polytechnic University of Valencia. He is currently employed at PRODEVELOP as a developer and analyst on GIS web and desktop projects. He is also the coordinator for the gvSIG Technical Steering Committee is in charge of the incubation process of gvSIG at OSGeo. He has also experience training on FOSS4G technologies (web mapping, desktop and mobile GIS) and published a book on web mapping in 2005.

He is a Charter Member of the OSGeo Foundation, a member of the OSGeo Incubation Committee, serves on the Boards of Directors of the Spanish language Local Chapter of the OSGeo Foundation.

As an active member of gvSIG and OSGeo, he has participated in several national and international meetings such as the gvSIG conference, JIDEE, Free GIS Spanish Meeting, XXII International Cartographic Conference and International meeting in Geomatics in La Havana.

Rafal Wawer

Rafal Wawer is a researcher at Institute of Soil Science and Plant Cultivation in Poland. He also directs FOSS4G training initiatives at the Spatial Applications Division of the Catholic University of Leuven in Belgium.

Scott Mitchell

Scott Mitchell is co-director of Carleton University's Geomatics and Landscape Ecology Research Laboratory in Ottawa, Canada, and an Assistant Professor in Carleton's Department of Geography and Environmental Studies. His research is directed at spatial analysis in support of environmental decision making, especially in agricultural and protected landscapes. Open source geospatial software and open standards provide valuable tools to enable his group's work, as well as transparent and accessible means to develop and share new algorithms and datasets. The lab's web site is <http://www.glel.carleton.ca>, and Scott can be reached at scott.mitchell@glel.carleton.ca.

Zachary Woolard

Zachary Woolard has a B.S. in Applied Geography. He has worked for six years in both government and private sector jobs, doing a little bit of everything along the way. His primary interests are open data standards, OSGEO in local government, and learning everything he can about databases, both open and proprietary.

Tyler Mitchell

Tyler Mitchell is the Executive Director of the Open Source Geospatial Foundation (OSGeo) and Editor in Chief of the OSGeo Journal. He serves on several OSGeo committees, speaks regularly to the international community and works closely with the members and directors to further the OSGeo mission. Tyler is one of the first published authors to address open source mapping technologies in his book *Web Mapping Illustrated - Open Source GIS Toolkits* (O'Reilly, 2005) which introduced MapServer, PostGIS and GDAL/OGR.
