Platforms to Build On

When you need more than ready-to-use tools, build on OSGeo Platforms to construct your own solution. These platforms use open standards that support interchange of data and processes:

- Web-based mapping
- Programming libraries
- Data access
- Image processing
- OGC specifications

OSGeo hosts the annual **FOSS4G** international conference event. Held in a new country each year, it brings together developers, users, NGOs, government, business and more.

FOSS4G.org

“ OSGeo does much more than support software projects. We also help build communities of interest around common needs and vision. Join our discussion mailing list and introduce yourself. ”

If you are interested in meeting others face-to-face, check out our **Local Chapter** initiatives – regional or linguistic groups exist around the world. Join one today or start a new one!

Projects

Geospatial Libraries

FDO
GDAL/OGR
GEOS
GeoTools

Metadata Catalog

GeoNetwork
Other Projects
Public GeoData
Education/Curriculum
OSGeo Journal

Web Mapping

deegree
Mapbender
MapBuilder
MapGuide Open Source
MapServer
OpenLayers

Desktop Applications

GRASS GIS
OSSIM
Quantum GIS
gvSIG
