|	
	Cartography's original multipolygons
	Buffer of distance +25 created by: SELECT c.gid, c.zap_09, c.cve_edo, c.cve_mun, geomunion(the_geom) as the_geom into buffer25a FROM (SELECT gid , zap_09, cve_edo, cve_mun, ST_Buffer((ST_Dump(the_geom)).geom, 25) AS the_geom FROM zap_total09) c GROUP BY 1,2,3,4;
	Over the buffer with distance +25, I create another buffer with distance 25 with: SELECT c.gid, c.zap_09, c.cve_edo, c.cve_mun, geomunion(the_geom) as the_geom into buffer0a FROM (SELECT gid , zap_09, cve_edo, cve_mun, ST_Buffer((ST_Dump(the_geom)).geom, -25) AS the_geom FROM buffer25a) c GROUP BY 1,2,3,4;

The error is clear here. The buffer with distance -25 takes a longer area than the buffer with distance +25
